

Accent on Health Chiropractic and Massage, 359 National Highway, 2nd Floor, LaVale, MD 21502
Patient Visit SOAP Note Date of Service: Thursday, April 19, 2007

PATIENT NAME: Bill Jones

SUBJECTIVE:

Bonnie relates that she is pleased with progress made since beginning care, especially since her last visit. Her pain level is 3/10 on the 0-10 scale. This is between mild and nagging pain and pain may occasionally limit her activity or movement.

OBJECTIVE:

PAIN/TENDERNESS (LOCATION, QUALITY, AND INTENSITY); C5, C6 and C7 with sharp pain 3/10.

ASYMMETRY/MISALIGNMENT (LOCATION); Spinal listings of: right C4, C5 and C6.

TISSUE SYSTEM CHANGES (SYSTEM, LEVEL/LOCATION, TISSUE CHANGE); spasm in the posterior cervical muscles on the right, in the right trapezius and trigger point activity in the right rhomboid.

ASSESSMENT:

She feels that she has improved 20% since Her initial visit in this office. She continues to make progress as planned and continued care is indicated.

PLAN:

Diversified chiropractic adjustment: right C4, C5 and C6. Toggle recoil adjustment: bilateral C2. Myofascial deep tissue work was performed over the right cervical spine. CPT 97110, Therapeutic exercises, defined as exercises used to develop strength and endurance, range of motion and flexibility. Examples include the use of graded resistance ranging from manual resistance to a variety of equipment including isokinetic, isometric, or isoinertial in one or more planes. CPT codes for the type of rehab services we provide in office are all based on the 15-minute, direct-contact definition. See her specific exercises detailed in her chart. These therapeutic exercises were performed today on her right posterior cervical area and posterior right shoulder region. Electrical manual stimulation (attended - each 15 minutes) 97032 was performed on her right posterior cervical area and posterior right shoulder region. 97010 - A superficial hot moist pack (for subacute or chronic condition) was placed over her posterior cervical area. Cervical traction is performed today as detailed in her care plan for 4 minutes or to the limits of her tolerance. .

She will be seen again in 2 days. She has made some progress to care so her response is favorable but I would say that Bonnie is only slightly better since beginning care.

Seen by: Dr. David A. Bohn, D.C. - This note has been electronically signed.
